About this Publication .....	III
Preface .....	IV
<b>Contents .....</b>	<b>V</b>
List of Figures .....	X
<b>Acknowledgements.....</b>	<b>XII</b>
<b>Scope .....</b>	<b>XIII</b>
<b>Purpose.....</b>	<b>XIII</b>
<b>Relationship Between EEMUA 191 and EEMUA 201.....</b>	<b>XIV</b>
<b>“Hard” vs “Soft” Control Desks .....</b>	<b>XIV</b>
<b>Definitions and Abbreviations.....</b>	<b>XV</b>
<b>1 Introduction .....</b>	<b>1</b>
1.1 Basic History.....	1
1.2 Interface Types .....	1
1.2.1 “Hard” Control Desks.....	1
1.2.2 “Soft” Control Desks – First Generation.....	2
1.2.3 “Soft” Control Desks – Second Generation .....	3
1.3 Control Room Design.....	4
1.3.1 Terminology – HCI vs HMI .....	4
1.3.2 The Role of the HMI.....	4
1.3.3 Beyond the HMI.....	5
1.3.4 Design Process .....	5
1.4 Management of Change .....	6
1.4.1 Minor Changes.....	6
1.4.2 Significant Changes.....	7
1.4.3 Major Projects .....	7
1.5 Justifying Control Room Upgrades .....	8
1.5.1 Process Improvements.....	8
1.5.2 Reduced Maintenance Costs .....	8
1.5.3 Improved HMI Graphics .....	9
1.5.4 Standardisation and Connectivity.....	9
1.5.5 Improved Working Environment.....	9
1.5.6 Easier Training.....	9
1.5.7 Improved Security and Resilience .....	9
1.6 Using this Guidance Document.....	10

1.7 Supporting Documents .....	10
<b>2 Control Building and Room Design .....</b>	<b>11</b>
2.1 Control Buildings .....	11
2.1.1 Location in Relation to the System Being Controlled .....	11
2.1.2 Location Risks.....	12
2.1.3 Location in Relation to Other Buildings.....	12
2.1.4 Evaluating Control Building Location .....	12
2.2 Control Building Features .....	14
2.2.1 Rooms within the Control Building.....	14
2.2.2 Building Height.....	16
2.2.3 Control Building Construction .....	16
2.2.4 The Importance of Good Welfare Facilities.....	16
2.2.5 Noticeboards.....	17
2.3 Control Room Physical Features .....	18
2.3.1 Size and Shape .....	18
2.3.2 Control Room Ceiling Height.....	19
2.3.3 Floor Design.....	20
2.3.4 Structural Features .....	20
2.3.5 Access, Egress and Movement of People .....	20
2.3.6 Windows.....	22
2.3.7 Segregated Spaces .....	23
2.3.8 Electrical Sockets.....	23
2.3.9 Future-Proofing .....	23
2.4 Control Room Working Environment.....	23
2.4.1 Lighting .....	23
2.4.2 Heating and Ventilation.....	25
2.4.3 Noise Levels .....	25
2.4.4 Furnishings.....	26
2.4.5 Colour Schemes.....	27
2.4.6 Humanising Features.....	27
2.5 Cleaning and Maintenance.....	27
<b>3 Console Design.....</b>	<b>29</b>
3.1 HMI Equipment.....	29
3.1.1 Optimising Screen and Panel Arrangement .....	30
3.1.2 How do People Use Screens and Panels in Control Rooms? .....	31
3.1.3 Arranging Normal Sized Screens .....	32
3.1.4 Large Screen Displays.....	33
3.1.5 How Many Screens .....	34
3.1.6 Input Devices .....	37
3.2 Console Desk.....	38

3.2.1 Size of Desk .....	38
3.2.2 Desk Height and Width .....	40
3.2.3 Shape of the Desk.....	42
3.2.4 Desk Construction .....	42
3.3 Control Room Chairs.....	42
3.4 Cable Management.....	42
3.5 Console arrangements .....	43
3.5.1 Supporting Communication .....	43
3.5.2 Supporting Face-to-Face Communication .....	43
3.5.3 Console Orientation .....	45
3.5.4 Reducing Distractions .....	47
3.5.5 Console Position in Relation to Windows.....	47
3.6 Communication Devices .....	48
3.6.1 Radio Communication.....	48
3.6.2 Telephone Communication.....	49
3.6.3 Public Address (PA) Systems .....	49
3.6.4 Communication by Internet.....	49
3.7 Other Control Room Equipment and Furniture .....	50
<b>4 Control System Human Machine Interface (HMI) design.....</b>	<b>51</b>
4.1 HMI Features .....	51
4.1.1 HMI Equipment.....	51
4.1.2 HMI graphical elements .....	51
4.2 HMI Design.....	51
4.2.1 Design requirements .....	52
4.2.2 Understanding Tasks .....	52
4.2.3 Human Strengths and Weaknesses.....	53
4.3 HMI Design Philosophy.....	54
4.4 HMI design palette.....	56
4.4.1 Use of Colour on HMI Graphics.....	56
4.4.2 Choice of Background Colour .....	56
4.4.3 Colour Scheme for Items on Graphics .....	56
4.4.4 Use of Symbols.....	58
4.4.5 Graphical Objects .....	58
4.4.6 Lines on Graphics.....	59
4.4.7 Use of Text .....	59
4.4.8 Use of Animation and Effects.....	59
4.5 Types of Displays.....	60
4.5.1 Overview Graphics .....	60
4.5.2 Control Graphics .....	62
4.5.3 Detailed Graphics .....	63
4.5.4 Faceplates .....	64

4.5.5 Task Specific Graphics .....	64
4.5.6 Plant Shutdown/Trip Graphics.....	65
4.5.7 Showing Data .....	65
4.5.8 Alarm Displays .....	66
4.5.9 Graphics for Managing Abnormal Operations.....	67
4.6 Navigation .....	67
4.6.1 Basic Requirements .....	67
4.6.2 Graphics Access Methods.....	68
4.6.3 Navigation When Training.....	68
4.7 Designing Graphics .....	69
4.7.1 Design Process for Graphics.....	69
4.7.2 Identifying User Requirements .....	69
4.7.3 Basic Rules for Graphic Design.....	70
4.7.4 Evaluating the HMI Graphic Design .....	70
4.7.5 Are there Enough Screens?.....	71
4.7.6 HMI Evaluation .....	71
4.8 Data Entry Consideration .....	72
<b>5 Accessing the Control System from Outside of the Control Room.....</b>	<b>73</b>
5.1 Managing Remote Access.....	73
5.2 Remotely Located HMI .....	73
5.2.1 Remote Control or Read-only?.....	73
5.2.2 Who is Operating?.....	74
5.2.3 Who Receives the Alarms?.....	74
5.2.4 Non-standard HMIs.....	75
5.3 Plant Information Management Systems (PIMS).....	75
5.3.1 Offline use of PIMS Systems.....	75
5.3.2 CROs Using PIMS Systems .....	75
5.4 Display Remote Access.....	76
5.5 Handheld Devices Used for Logging Data.....	76
<b>6 Training and Competence.....</b>	<b>77</b>
6.1 Role of the CRO.....	77
6.1.1 CRO Technical Competencies .....	77
6.1.2 CRO Non-technical Competencies.....	77
6.2 Achieving Competence .....	78
6.2.1 Selecting Personnel to become CROs .....	78
6.2.2 Initial Training and Assessment.....	79
6.2.3 Gaining Experience.....	79
6.2.4 Continual Learning .....	79
6.3 Use of Simulators.....	80
6.4 Training and Assessment Following System and/or HMI Change.....	81

6.5 Control Engineer Competence.....	81
<b>7 Maintenance .....</b>	<b>83</b>
7.1 Maintenance of the Control System and HMI.....	83
7.1.1 Role of Control Systems and HMI in Safety.....	83
7.1.2 Requirements for Reliability and Redundancy.....	83
7.1.3 HMI Redundancy.....	84
7.1.4 Preventative Maintenance of the Control System and HMI.....	84
7.1.5 Designing for Maintenance .....	85
7.2 Maintenance Performed in the Control Room.....	85
7.3 Cleaning the Control Room.....	85
7.4 Maintenance Areas in the Control Building .....	86
<b>8 Security.....</b>	<b>87</b>
8.1 Security Issues that need to be Considered.....	87
8.2 Preventing Physical Intruders.....	87
8.3 Preventing Industrial Espionage and Malicious Interference.....	88
8.3.1 Physical Separation.....	88
8.3.2 Control of Digital Access.....	88
8.3.3 Access by CRO.....	89
8.4 Coercion and Insider Threat.....	89
8.5 Managing Security Risks.....	89
8.6 Further Reading.....	90
<b>Appendix 1. Human Factors Integration Plan .....</b>	<b>91</b>
A1.1 Purpose of a HFIP .....	91
A1.2 Project Lifecycle .....	91
A1.3 Using the HFIP Template .....	91
A1.4 HFIP Template – Introduction.....	92
A1.5 HFIP Template – Concept/Select phase.....	94
A1.6 HFIP Template – Define Phase.....	102
A1.7 HFIP Template – Develop/Execute Phase .....	107
<b>Appendix 2. Evaluation checklist .....</b>	<b>113</b>
A2.1 Basic details.....	113
A2.2 Design process.....	114
A2.3 Control Building evaluation.....	115
A2.4 Rooms in the Control Building .....	116
A2.5 Control Room .....	117
A2.6 Control Room conditions .....	118
A2.7 Console desk.....	119
A2.8 Facilities for Control Room Operators (CROs) .....	120
A2.9 Human Machine Interface (HMI) .....	120

A2.10 Function outside of the Control Room .....	122
A2.11 CRO competence .....	123
A2.12 Maintenance .....	123
A2.13 Security .....	124
<b>Appendix 3. Task Requirements Analysis (TRA) .....</b>	<b>125</b>
<b>Appendix 4. Optimising the Arrangement of Screens and Panels in the Control Room .....</b>	<b>131</b>
A4.1 Overall method.....	131
A4.2 Systems to be Used by the CRO Via a Screen or Panel .....	131
A4.3 Use of Each Screen and Panel .....	132
A4.4 Time Spent Performing 'Work' .....	132
A4.5 Monitoring Activities .....	133
A4.6 An Example .....	134
<b>Appendix 5. Control Room Questionnaires .....</b>	<b>137</b>
A5.1 Engineer Survey Form .....	137
A5.2 Operator Survey Form .....	140
A5.3 Operator Task Review Questionnaire.....	143
<b>9 References .....</b>	<b>147</b>
<b>Bibliography.....</b>	<b>149</b>

## List of Figures

Figure 1: A typical first generation DCS system .....	2
Figure 2: A DCS system using graphics-based control .....	3
Figure 3: HMI, the sensory interface between operator and plant.....	4
Figure 4: Control room and surrounding rooms (e.g. meeting room, manager's office) .....	13
Figure 5: The break and kitchen area associated with a control room.....	17
Figure 6: Ensuring the correct usable height is provided .....	19
Figure 7: Illustration of how ceiling height should be determined, assuming a fixed height desk.....	20
Figure 8: Design means visitors are likely to be intercepted before reaching the Control Room.....	21
Figure 9: A console with small and large screens, hard-wired matrix and digital displays.....	30
Figure 10: Default arrangement of screens on the Console Desk .....	32
Figure 11: Screens arranged as double height row .....	32
Figure 12: Screen arrangement .....	34
Figure 13: Illustration of how four screens may be used by the CRO .....	35
Figure 14: More screens are visible when double height row is used.....	35

Figure 15: Using a large screen display to increase system visibility..... 36

Figure 16: Use of quad groups of screens ..... 36

Figure 17: Operator at desk with quad and single height screens and large screen visible ..... 37

Figure 18: Ensuring the CRO can use paperwork at the desk..... 40

Figure 19: Typical dimensions for a fixed height desk..... 41

Figure 20: Person stood behind desk talking to operator..... 44

Figure 21: Doors should not be directly behind the CRO when sat at the Console Desk..... 45

Figure 22: Desks create an area perceived as impenetrable that discourages people from entering..... 46

Figure 23: Control room desk arrangement..... 47

Figure 24: Indication of preferred and unsuitable window positions..... 48

Figure 25: Flowchart guide to determine what standard to apply for new HMI or when modifying an existing HMI..... 55

Figure 26: Red used to show alarm only – immediately obvious..... 57

Figure 27: Red used to indicate an alarm and also valve/pump status – presence of alarm may not be immediately apparent..... 57

Figure 28: An example of Level 1 graphics..... 61

Figure 29: An example of Level 1 graphics with radar plot..... 62

Figure 30: An example of Level 2 graphics..... 63

Figure 31: An example of Level 3 graphics..... 64

Figure 32: Method of showing data in context..... 65

Figure 33: Display allowing quick comparison and detection of problems..... 66

Figure 34: Visibility when sat in front of the Control Systems screens ..... 135

Figure 35: Visibility when sat in front of the Compressor screen ..... 135

Figure 36: Improvement achieved by creating a double row of screens on the console desk..... 136

Figure 37: Improvement achieved by providing a large screen display duplicating information used to monitor the ESD and F&G systems..... 136

Figure 38: Reducing viewing angles by curving the desk..... 136
